For decades, adult coho salmon (*Oncorhynchus kisutch*) in the Pacific Northwest have been dying en masse in urbanized areas when storms coincide with their migration upstream to spawn. Because of the correlation with rain events and a series of insightful investigations, the mortality seemed linked to contamination in stormwater runoff from roads(McIntyre et al. 2018 [G7QW7PSD] McIntyre, Jenifer, Jessica Lundin, James Cameron, et al. 2018. “Interspecies Variation in the Susceptibility of Adult Pacific Salmon to Toxic Urban Stormwater Runoff.” Environmental Pollution 238: 196–203. https://doi.org/https://doi.org/10.1016/j.envpol.2018.03.012. Chow et al. 2019 [7RMZ3UNQ] Chow, Michelle I., Jessica I. Lundin, Chelsea J. Mitchell, et al. 2019. “An Urban Stormwater Runoff Mortality Syndrome in Juvenile Coho Salmon.” Aquatic Toxicology 214 (September): 105231. https://doi.org/10.1016/j.aquatox.2019.105231. Spromberg et al. 2016 [GI97QYN4] Spromberg, Julann A., David H. Baldwin, Steven E. Damm, et al. 2016. “Coho Salmon Spawner Mortality in Western US Urban Watersheds: Bioinfiltration Prevents Lethal Storm Water Impacts.” Journal of Applied Ecology 53 (2): 398–407. https://doi.org/https://doi.org/10.1111/1365-2664.12534.)) (J. McIntyre et al. 2018; Spromberg et al. 2016; Chow et al. 2019). Researchers named the phenomenon urban runoff mortality syndrome (URMS) (Z. Tian et al. 2021; Scholz et al. 2011). According to the Washington State Department of Ecology (WA Ecology), “…for over 20 years, scientists faced a mystery: coho salmon (also known as silver salmon) returning to urban streams and rivers in the Puget Sound region were dying before they could lay their eggs. The culprit was unknown, but it seemed linked to toxic chemicals running off our roads and highways” (Flores 2023 [KYFH4S96] Flores, Mugdha. 2023. “Saving Washington’s Salmon from Toxic Tire Dust.” January. https://ecology.wa.gov/blog/january-2023/saving-washington-s-salmon-from-toxic-tire-dust.). In some cases, 90% mortality of returning coho salmon was observed (Feist et al. 2017 [4PSDP2BG] Feist, Blake E., Eric R. Buhle, David H. Baldwin, et al. 2017. “Roads to Ruin: Conservation Threats to a Sentinel Species across an Urban Gradient.” Ecological Applications 27 (8): 2382–96. https://doi.org/https://doi.org/10.1002/eap.1615.).
